OFFICIAL SUPPLIER

Choosing the right ski length is a very important and personal choice. The selection of the ski model and its length should be determined by the skier's ability, height, power and weight. Note that all charts take only the weight into consideration ! Our chart is based on our testing and coaches recommendations and should be the starting point of your thought process for choosing the right equipment. For any additional information and guidance, please ask your Blizzard Tecnica Firebird Race center.
